### Product Overview

- Elite fire control panels can send data to, and be controlled by, the Guide system providing a single point of control for all alarms.
- The powerful 32 bit program features a standard Windows look and feel and runs under Windows® XP, Vista or Windows® 7.
- The system is highly configurable in terms of the style of presentation so that the end user can be presented with maps, text, photographs, audio or a combination of all as required.
- User profiles allow the system manager to control the options available to each individual system user.
- A comprehensive history logging and reporting system allows analysis of events and trends to be identified to reduce unwanted alarms.
- Easy to program and simple to use, Guide provides a cost-effective solution for fire alarm management at many levels.
